Statistics	Values
Stars Count	1
Forks Count	0
Issues Count	1

Metric	Values
README Presence	✓
License Presence	X
Documentation Presence	X
Examples Presence	✓
Requirements Presence	X
Tests Presence	✓
Description Presence	✓

Repository Structure:

- Compliance: The repository contains a README, example directory, test directory, and GitHub-specific contributing and issue template files, but lacks a LICENSE, separate documentation directory, and requirements/dependency files.
- Missing files: LICENSE, requirements file, dedicated documentation directory/file
- Organization: The file organization is basic but logical, with main source, configuration, examples, tests, and GitHub workflow files present in the root.

README Analysis:

- Quality: The README is clear, well-structured, and covers most user needs including overview, features, installation instructions, links to examples, contribution steps, and citation information.
- Project description: Yes
- Installation: Yes
- Usage examples: Yes
- Contribution guidelines: Yes
- License specified: No
- Badges present: Yes

Documentation:

- Tests present: Yes
- Documentation quality: The documentation in the README is good for getting started, but no extended developer documentation or API docs are present. There is no dedicated documentation directory or file.
- Outdated content: No

Key Shortcomings:

- No LICENSE file, so legal usage and contributions are unclear.
- No requirements.txt or other dependency specification file.
- No extended documentation or API references beyond the README.

Recommendations:

- Add a LICENSE file to clarify usage rights and encourage contributions.
- Include a requirements.txt or similar file listing dependencies such as Selenium.
- Consider adding more detailed developer documentation or usage notes, possibly in a docs/ directory.
